

# 7% Fabric Softener

## Fabric Softener & Laundry Sour

7% Fabric Softener is a general purpose fabric softener that leaves clothes and fabrics soft and fluffy. It will also neutralize any alkaline residues left behind by the laundry detergent. 7% Fabric Softener will leave your wash with a clean, fresh scent, neutral pH and reduced static cling.

- **Balances pH of Fabrics**
- **Leaves Fabrics Soft, Fluffy and With a Fresh Scent**
- **Reduces Static Cling**

**Usage Directions:** Always consult fabric/garment manufacturer's washing directions before use. Normal use will call for 1 fluid ounce per full 25 pound wash load. Add to rinse water, not directly on fabrics. If using an automatic softener dispenser, pour in and add water to keep clean and avoid spotting. Rinse dispenser periodically. If spotting appears on fabrics/clothes, dampen fabric with water, rub with mild soap, rinse and rewash.

7% Fabric Softener is not for use on children's sleepware or other fabrics labeled as flame resistant as it may reduce flame resistance.

### Safety & Hazards

Wear Protective Eye Glasses While Using 7% Fabric Softener

**Consult SDS for Further Safety Precautions**

**DOT Shipping Name:** Not Regulated

### 7% Fabric Softener

#### Dilution Guidelines

Usage	Dilution
Normal Usage	1 Fluid Ounce per 25 Pound Load
