

Acid Q

Phosphoric Acid Quaternary Sanitizer

A broad-spectrum, acid sanitizer, effective as a disinfectant, neutralizer and scale remover. This product will sanitize and disinfect food processing plants, dairies, and other facilities where sanitation control is required. Acid Q is an effective bactericide and virucide in the presence of organic soil. This product can be used as a final step neutralizer and sanitizer in CIP and other operations. Consult product label for a full list of approved uses.

- **Brightens Stainless Steel Surfaces**
- **Neutralizes Alkaline Residue & Sanitizes in 1 Step**
- **No Rinse Required**
- **Removes Milkstone & Hard Water Film**

Usage Directions: Sanitizing Previously Cleaned, Non-Porous Surfaces & Equipment in Food, Beverage, Meat, Poultry, Egg & Seafood Processing Plants: Remove all gross food particles and soil from equipment and surfaces with a good detergent, pre-flush, pre-soak or pre-scrape treatment. Rinse with potable water. Prepare a 200-400 ppm active quaternary solution by adding 1-2 ounces of this product to 4 gallons of water. Sanitize with this solution by wetting all surfaces thoroughly by application of a coarse spray, flooding, immersion or brushing. Allow sanitizer solution to contact surface for at least one minute. Air dry--DO NOT RINSE. See product label for full listing of approved uses.

Safety & Hazards

Wear Protective Eye Glasses, Chemical-Resistant Gloves and Waterproof Apron While Using Acid Q

Consult SDS for Further Safety Precautions

DOT Shipping Name: UN 1903, Disinfectant Liquid Corrosive, 8, PG III

Technical Information:

Appearance: Clear Liquid
Odor: None
pH: <3.0
Foam: Moderate Foam

Associated Products:

FCC-3, Foaming Chlorinated Detergent With Caustic & Rinse Agents

Multi-Chlor, 12.5% Sodium Hypochlorite Sanitizer

MG 4-Quat, 5th Generation Quaternary Sanitizer & Disinfectant

Acid Q Dilution Guidelines

Usage	Dilution
No-Rinse, Food Contact Sanitizer	1-2 Ounces : 4 Gallons (200-400ppm quat)
Dairy Applications (Milking & Dispensing Equip)	1 Ounce : 4 Gallons (200 ppm)

Titration Kit:

QT-10 and/or Quat
Check 1000, Quaternary Test Strips
See Color Chart on Test Strip Container
MRTK9000-Z, Quaternary Titration
1 Drop = 10 ppm

Warning: Do Not Mix With Chlorinated Products.
