

Dry Bleach 6%

Dry Chlorinated Bleach for Whites

Dry Bleach is a highly chlorinated product with fast bleaching action. It is used for normal bleaching of white linen in commercial and institutional laundry machines. Powdered bleaches are safer than liquids. They release the active bleaching agent into the wash more slowly to create a more balanced bleaching effect. Traditional liquid bleaches may shock the fabric and sometimes create a yellowing effect. Dry Bleach 6% has a unique combination of ingredients to safely bleach all washable white laundry fabrics whiter and brighter and remove stains, whether you are washing in hot, warm, or cold water. Dry Bleach 6% is particularly effective in removing stains from cotton and linen fabrics. Dry Bleach 6% is free-flowing and offers increased versatility and ease of handling. It can be added in dry form to automatic washers or to the supply compartment of automatic feeding equipment. Dry Bleach 6% dissolves readily and completely, leaves no residues, and does not cake on equipment surfaces. Since Dry Bleach 6% is a dry powder, it remains stable during storage with no loss of chlorine or bleaching power.

- **Highly Concentrated to Reduce Inventory and Usage Cost**
- **Superior Whitening Properties for White Laundry**
- **Dissolves Quickly when Added to the Wash**
- **Provides Rapid Stain Removal**

Usage Directions: Keep dry. Replace cover after use. Add appropriate amount to wash water with detergent.
