

Improve Liquid Break

Laundry Pre-Soak & Alkalinity Booster

Improve Liquid Break is a premium alkaline laundry booster meant to be used in combination with detergents to a high-powered laundry detergent. It will exhibit colloidal activity preventing soil redeposition. Improve Liquid Break contains potassium hydroxide, builders, water conditioners, optical brighteners and anti-redeposition agents that produce superior results in commercial laundry operations. Highly concentrated--only one cup per 100 pounds of dry laundry (medium soil load). It rapidly penetrates, breaks down and flushes away food residues, grease, fats, oils, lipstick, protein, coffee, tea and other stains. It also prevents soil redeposition and helps tie up water hardness that causes fabric to dull or gray. Improve Liquid Break removes tough, set in stains that other commercial detergents leave behind. It also works as a booster and builder for regular powdered and liquid laundry detergents. Improve Liquid Break works in hard or soft water. It's completely soluble, fast rinsing and leaves no buildup on fabrics and produces consistent results every time.

- **High-Alkaline Laundry Performance Booster**
- **Cuts Through Heavy Food Soils, Blood & Grease**
- **Contains Anti-Redeposition Agents**
- **Keeps Whites Bright & Colors Vibrant**

Usage Directions: Concentrations will vary according to water hardness, soil load, water temperature, time and machine efficiency. When using chlorine or color-safe (oxygen) bleach, add to the wash solution 3 to 5 minutes after the wash cycle begins. Recommended for commercial and institutional use only. Not for use in home laundry machines. Never apply undiluted builder/break directly to fabric. Dispense builder/break after fill water has entered the machine. Do not use Improve Liquid Break on wool, silk, or other delicate fabrics.

Safety & Hazards

Wear Protective Eye Glasses, Chemical-Resistant Gloves and Dust/Mist Mask While Using Improve Liquid Break

Consult SDS for Further Safety Precautions

DOT Shipping Name: UN 1814, Potassium Hydroxide Solution, 8, PG II

Technical Information:

Appearance: Purple Liquid
Odor: None
pH: <12.0
Foam: Non-Foaming

Associated Products:

Detergent Concentrate, Heavy Duty Detergent & Foam Booster Premium Liquid Laundry, Highly-Effective Laundry Detergent Collar-Aid, Highly Concentrated Degreaser & Laundry Spotter 7% Fabric Softener, Fabric Softener & Laundry Sour

Improve Liquid Break

Dilution Guidelines

Usage	Dilution
Heavy Soil	8 - 16 Ounces / 100 Pounds
Medium Soil	6 - 10 Ounces / 100 Pounds

Warning: Do Not Mix With Acidic Products. Some Fabrics May Need Special Attention. Always Consult Fabric Manufacturer's Washing Instructions For Proper Care.
