

# MG NSA

## Non-Silicated Aluminum Cleaner

MG NSA is a liquid, non-silicated mildly alkaline spray or immersion cleaner for Stainless Steel, Titanium, Aluminum and other non-ferrous and Ferrous metals. It contains wetting agents to enhance the normal cleaning ability of mild alkalis and is very free rinsing. Little or no scale or sludge builds up in the washer or on the heating elements.

- **For Ferrous & Non-Ferrous Metals**
- **Oil Splitting Degreaser**
- **Meets AQMD Rule 1171 & 1122**
- **Low Foaming**
- **RoHS Compliant**
- **VOC: 2 Grams/Liter at Use Level 6 oz/gallon**

**Usage Directions:** MG NSA can be used at temperatures from as low as 125° F up to 180° F.

### Safety & Hazards

Wear Protective Eye Glasses and Chemical-Resistant Gloves While Using MG NSA

**Consult SDS for Further Safety Precautions**

**DOT Shipping Name:** Not Regulated

### MG NSA

#### Dilution Guidelines

Usage	Dilution
Metal Cleaner	4 - 6 oz / gallon

#### Titration Kit:

MRTK5002-Z, Mild Alkalinity Titration  
1 Drop = 0.67 oz per gallon

### Technical Information:

Appearance: Straw-colored Transparent.  
Odor: Mild  
pH: 9.5 - 10.5  
Foam: Low Foam
