

Squat Laundry Detergent

Premium Concentrated Laundry Detergent

A premium, super-concentrated laundry detergent excellent for cleaning both synthetic and natural fabrics. Penetrates stains and promotes emulsification of oily soils. Contains optical brighteners that renew brightness of whites and colored fabrics. Ideal for many types of industrial and institutional laundry. Will not harm any water washable fabric. Performance and rinsability are unaffected by moderate levels of water hardness. Water conditioning agents help prevent the deposition of dulling, graying film on fabrics.

Usage Directions: Squat Laundry Detergent is a multi-functional product for use in laundry operations that require the use of a minimum amount of individual products for shorter laundry formulas.

Squat Laundry Detergent is a powerful detergent effective on a variety of soils. This product also contains a chelating water conditioner and optical brightener. Phosphate free. Ideal for use in automatic feed equipment.

Consult garment washing instructions for acceptable wash temperature.

Safety & Hazards
