Re: Extension of Expiry Date

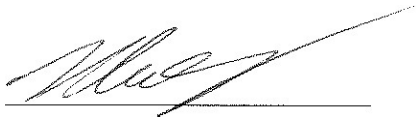

To Whom It May Concern:

Custom Chemical Formulators, Inc. followed FDA guidelines for establishing shelf life of new products, specifically “DermaGel 62 and DermaSan 72”. The FDA guidelines 21 CFR 211.166 Stability Testing and 211.137 Expiration Dating stated that data must support shelf-life declaration.

At this time frame, we have acquired additional data and proven to have the product’s shelf-life to (12) twelve months. We will continue the shelf-life studies for 24 months and send an update on a later date.

If you have any further questions, please feel free to contact me directly.
